

What Parents Experience

- * Thoughtful educator communication
- * Guided parenting insights
- * Community Connection
- * Child documentation and learning stories
- * Warm transitions into schooling years

Founder's Note

Circles & Cycles was created from a belief that children thrive when education honours both intellect and emotion. Our intention is simple; to create a place where children feel deeply understood and families feel genuinely supported.

- Naama Singh

Visit.
Observe.
Feel the Difference.

Childhood, thoughtfully designed.

An international-standard early childhood community rooted in attachment science, Reggio Emilia philosophy and meaningful learning

Why Parents Choose

Circles & Cycles

Relationship First Learning

Children learn through emotional safety and connection.

International Pedagogical Standards

Inspired by Reggio Emilia with contemporary neuroscience integration.

Small Community, Deep Attention

Every child is known, observed and guided individually.

Parent Partnership Model

Parents are active collaborators, not passive recipients

Most preschools focus on what children learn.

We focus on how children become learners.

Because research shows children who feel secure learn faster, adapt better and thrive longer.

Children at Circles & Cycles

Develop:

- Emotional Confidence
- Independent Thinking
- Strong Communication Skills
- Social Ease & Empathy
- Love for Learning

Is this the right school for your family?

Ask yourself:

- Does my child feel deeply seen by adults around them?
- Is learning happening through curiosity or pressure?
- Will my child be known as a personality, not just a student?
- Does the school partner with parents, not just inform them?
- Can I imagine my child feeling safe here every morning?

If you checked most boxes, you may already be aligned to Circles & Cycles.

Our Educational Philosophy

At Circles & Cycles, childhood is viewed as a period of profound intellectual, emotional and social formation.

Our approach integrates

- Reggio Emilia philosophy
- Attachment and developmental neuroscience
- Play-based inquiry learning
- Environment as the third teacher
- Reflective educator practice

Learning emerges through exploration, collaboration and meaningful relationships, allowing children to develop competence, confidence, and a strong sense of identity.

The Environment

Our 6000 sq. ft. thoughtfully curated space is designed to invite exploration, independence and creativity.

Materials are intentionally selected to encourage

- Imagination
- Sensory engagement
- Play-based inquiry learning
- Collaboration
- Sustained attention

The Circles & Cycles Journey
